(54) Title: MAGNETIC SYSTEM OF THREE INTERACTIONS

Fig. 34

(57) Abstract: Magnetic system possessing and producing polar and field properties comprising an application of organized ensemble of constituted constructions of magnetic apparatus as means of construction. The magnetic system as an application produces magnetic phenomena and interactions, such as the production of three different interactions and also their related respective three opposites, depending on the distance existing between the magnetic constructions. It is a fully systemized product that can be used as an experimental instrument for exploitation of new designing possibilities in magnetic constructions, containing also a method of manufacturing.
